

# RESEARCH OPPORTUNITY!

## BACHELOR'S STUDENT (THESIS/INTERN) ANIMAL BEHAVIOUR AND NEUROENDOCRINOLOGY

MAX PLANCK INSTITUTE  
FOR BIOLOGICAL INTELLIGENCE

Are you a Bachelor's student eager to do some exciting research for your thesis project or internship?  
We have an excellent opportunity for you to join our interdisciplinary research team!

This opportunity offers the scope of conducting your thesis/internship project within the framework of a long-term, highly interdisciplinary, collaborative study.

### Requirements:

- Bachelor's student with a strong interest in animal behaviour and neuroendocrinology
- Basic knowledge of data handling and statistics
- Training will be provided for using analysis tools as per the project's requirements

### Thesis/Internship Focus:

- You will investigate socio-sexual behaviours in a specially developed strain of transgenic chicken
- The primary focus of the project will involve conducting behavioural experiments and analyzing audio and video telemetry data

### Contact:

Mekhla Rudra  
Dept. of Behavioural Neurobiology
